NPR-HD Crew Cab vs. RAM 4500 CC

NPR-HD Crew Cab Advantages Over RAM 4500 Crew Cab:

- Proven Isuzu 4H Family of Engines with B-10 Life of 310,000 Miles. Ram uses outsourced 6.7 Cummins Engine
- NPR-HD has two wheelbases 150, 176 with longer Cab to Axle options allowing longer bodies, but shorter turning radius
- NPR-HD can accommodate 14% more cargo capacity with body up to 16 ft. in length vs. a maximum 14 ft. on Ram
- Built from the ground up as a commercial vehicle for a long life. RAM 4500 is derived from a pickup.
- NPR-HD 14,500 GVWR versus RAM 4500 16,000 GVWR but has about the same body and payload allowance due to lighter total chassis weight
- Reverse Elliot I-Beam front axle is strong and durable. Mono I Beam used on RAM 4500 varies camber with load, contributing to tire wear
- NPR-HD Front Tapered leaf springs provides a smoother ride then RAM 4500 Coil springs
- N-Series rear axle capacity of 14,550 is 21% higher than RAM at 12,000 lbs.
- Greater payload capacity because of lighter truck weight. NPR diesel weighs approximately 1300 lb. less than comparable RAM 4500
- Tilt cab allows easy engine access. Limited engine access on RAM 4500 with very high reach-over to engine area.
- Tighter turning diameter curb-to-curb for comparable cab-to-axle ratio (45.3 ft./150 in. WB vs. 50.4 ft./197 in. WB) improves maneuverability by 11%
- 16-inch truck tires average 50% less expensive to replace and more readily available than 19.5-inch tires on Ram 4500
- Wider door opening for easy entry and exit 85 degree vs. 70 degree
- Durable tricote breathable woven seat material is comfortable and long lasting. Solid vinyl on RAM 4500
- Standard tilt and telescopic steering column contributes to driver comfort
- Grab handle to assist entry and exit contributes to safety on the job. Not available on RAM 4500
- Longer scheduled maintenance intervals helps reduce downtime and service costs
- Standard fold-down center seat includes convenient work area on NPR; base seat on RAM 4500 is non-folding bench
- Greater visibility with larger windshield, larger side windows, larger side mirrors and lower dash to improve vision.
- Standard daytime running lamps vs. optional
- Battery box on frame rails of NPR helps extend battery life by removing batteries from hot under-hood area
- Easier serviceability with in-cab fluid checks vs. RAM's under-hood fluid-checks
