NPR-HD vs. International TerraStar Class 4

NPR-HD Advantages Over TerraStar:

- Proven Isuzu 4H Family of Engines with B-10 Life of 310,000 Miles. TerraStar uses older designed V-8 PowerStroke
- NPR has four wheelbases 109, 132, 150, 176 with longer Cab to Axle options allowing longer bodies, but shorter turning radius
- NPR-HD can accommodate more cargo capacity with body up to 20 ft. in length
- NPR-HD 14,500 GVWR has similar body and payload allowance versus TerraStar with 16,000 GVWR due to heavy Class 6 components
- N-Series rear axle capacity of 14,550 is 8% higher than TerraStar at 13,500 lbs.
- Tilt cab allows easy engine access. Limited engine access on TerraStar due to EGR system
- Tighter turning diameter curb-to-curb for comparable cab-to-axle due to Cab Over design
- 16-inch truck tires average 50% less expensive to replace and more readily available than 19.5-inch tires on TerraStar
- Wider door opening for easy entry and exit 85 degree vs. 60 degree
- Durable tricote breathable woven seat material is comfortable and long lasting. Solid vinyl on TerraStar
- Standard tilt and telescopic steering column contributes to driver comfort. Optional tilt steering wheel on TerraStar
- Longer scheduled maintenance intervals helps reduce downtime and service costs
- Standard fold-down center seat includes convenient work area on NPR; base seat on TerraStar is non-folding bench
- Standard diesel exhaust brake can contribute up to 30% improved brake life and braking performance. Not available on TerraStar
- Greater visibility with larger windshield, larger side windows, larger side mirrors and lower dash to improve vision. Front sight line of 8.6 ft. for NPR vs. 23.8 ft. for TerraStar
- Easier serviceability with in-cab fluid checks vs. TerraStar under-hood fluid-checks
